

ELECTRIC CITY 2021 COPENHAGEN (27-29 APRIL 2021)

Wind • **ELECTRIC CITY 2021**
EUROPE 27-29 APRIL COPENHAGEN

“Electric City” is a new onshore and offshore wind event, with participants from wind and beyond! Heavy industry, mobility, district and domestic heating, storage, hybrids, hydrogen and many more are invited to join the conversation on how we build a clean economy. This means new voices at the conference. It means new business partners and customers for you on the exhibition floor.

Dutch Village in Hall C1, with a total floorspace of 240m², is located at an excellent location, right behind the main entrance and registration area.

Do you want to present your company at this prominent exhibition and make use of the many benefits of participating in Dutch Village? Book your stand now or drop us a line for additional information.

For bookings or enquiries, contact Nederlandse WindEnergie Associatie (NWEA)

Daniëlle Veldman (+31 (0)6 54 73 29 61) or Erik van Diest, dutchvillage@nwea.nl
